About Me

I'm an **AI / ML Engineer** with **4+ years of experience** building machine learning solutions that drive real business impact. I specialize in:

- 🤖 Developing & deploying **predictive ML models**
- ⚙️ Automating **end-to-end MLOps pipelines**
- 🔄 Building **scalable data pipelines** for real-time analytics
- 💬 Designing intelligent systems using **LLMs, RAG, and agent-based architectures**

I bring a mix of **technical depth and product intuition** — whether it's optimizing a recommendation engine or automating a complex analytics workflow.

Skills & Tech Stack

Languages & Querying

AI / ML & Data

Cloud & DevOps

Work Experience

 **AI & Data Analytics Intern — Maple Direct (2025 – Present)**

Assisting in the development of AI-driven insights and analytics pipelines to support data-informed marketing and business strategies.

 Data Engineer — *Ducen, an Orion Innovation Company* (2020 – 2024)

Designed and maintained scalable data pipelines, enabling real-time analytics and supporting enterprise machine learning initiatives.

 Freelance Developer (2016 – 2020)

Delivered end-to-end software and web solutions for diverse clients, focusing on performance, usability, and custom development.

 Featured Projects

 AI & ML Solutions

Project	Description
Business-Centric RAG Assistant Bot	Intelligent assistant leveraging RAG architecture for business knowledge retrieval
Context-Aware Summarization Agent	LLM-powered agent that generates context-sensitive document summaries
Automated Client Presentation Generator	Auto-generates client-ready presentations from structured data
Multiclass Model for Address Validation	ML model for classifying and validating address formats at scale
SLA Breach Prediction Model	Predictive model to proactively identify SLA breach risks
Customer Lifetime Value (CLV) Forecasting	Forecasting model to estimate and optimize customer lifetime value
Quote Approval Prediction	ML model predicting quote approval outcomes from customer data
Sentiment Analysis on Voice of Customer Data	NLP pipeline for sentiment extraction from customer feedback
	Classifier for simulating and categorizing business

Data Engineering & Pipelines

Project	Description
Data Standardization Framework with Django	Web framework for enforcing data standards across enterprise datasets
End-to-End Data Lifecycle Management Pipelines	Full lifecycle data pipelines from ingestion to reporting
Scalable Data Integration Pipelines	High-throughput integration pipelines across heterogeneous data sources
Rule-Based Entity Matching System	Deterministic entity resolution system for large-scale data matching

MLOps & Automation

Project	Description
End-to-End MLOps Suite	Comprehensive suite covering model training, tracking, deployment, and monitoring
API Deployment Suite	Standardized framework for deploying ML models as production-ready APIs
Automated Insights Generator	Automated pipeline that produces analytical insights from structured data

Education

- **Business Insights and Analytics** — Humber College (2024 – 2026)
- **B.Tech, Information Technology** — Sri Krishna College of Technology (2016 – 2020)

Certifications

- Introduction to Azure OpenAI Service — *Microsoft Azure*
 - Machine Learning with Python — *Cognitive Class*
 - Introduction to Generative AI — *LinkedIn Learning*
 - Introduction to Prompt Engineering — *LinkedIn Learning*
 - GitHub Copilot — *LinkedIn Learning*
 - Python Basics — *HackerRank*
 - Statistics 101, Hadoop 101, Hive, MapReduce & Yarn — *Cognitive Class*
 - Machine Learning with R, R 101 — *Cognitive Class*
-
